

Veterinarian Instruction Sheet for World Dairy Expo Health Check-In

EXHIBITORS

Please share this sheet with the veterinarian who will be completing your World Dairy Expo paperwork

Dear Veterinarian,

Thank you for supporting and assisting the exhibitors with whom you are working as they complete their health papers to participate in World Dairy Expo. Without our exhibitors and the support network back home, including you, World Dairy Expo would not be what it is today. We are asking for your assistance once again as you complete the exhibitor's certificate of veterinary inspection (CVI). Please follow the guidelines below to expedite their arrival and unloading at World Dairy Expo.

Sincerely,

World Dairy Expo

For the most up-to-date health regulation information, please visit the Wisconsin Department of Agriculture, Trade and Consumer Protection's World Dairy Expo pages:

Main page: https://datcp.wi.gov/Pages/Programs_Services/WorldDairyExpo.aspx

FAQ page: https://datcp.wi.gov/Pages/Programs_Services/WorldDairyExpoFAQ.aspx

Items of Note on the Certificate of Veterinary Inspection:

- A certificate of veterinary inspection (CVI) is required for all animals attending World Dairy Expo. As the CVI is current for 30 days from the date you examine the animals, the inspection date must be after September 1, 2018. For animals from outside Wisconsin, keep the return date in mind if the owner intends for the animals to return to the state of origin on this CVI.
- Consigner/Origin should be the owner, farm of origin address.
- Consignee/Destination must be World Dairy Expo, 1919 Alliant Energy Center Way, Madison, WI 53713. The livestock premises code is 004A6S7 (Thanks to the Alliant Energy Center staff for allowing us to post the code number here for your use.)
- Official Animal Identification is required for all animals using one of World Dairy Expo's accepted 15-digit identification methods
 - USDA 840 RFID or visual tag (for example, 840 003007863940)
 - A Canadian 124 AIN RFID tag (for example, 124 002999999999)
 - A manufacturer-coded tamper-evident RFID tag that begins with 900, 982, or 985*

* **NOTE: Manufacturer coded RFID tags were discontinued as official ID by USDA starting in 2015. However, tags applied before March 11, 2015 will be recognized as official ID for the life of the animal.**
- Animal health testing requirements based on animal's state of origin
 - **Michigan's Federal TB Free Zone, Texas, and the Indiana counties of Franklin, Fayette, Union, Rush, Decatur, Ripley, and Dearborn:** each animal must have either a negative tuberculosis test within 60 days before the date of import OR originate from an accredited TB-free herd with herd number and accreditation date on the CVI. The herd accreditation test must be within two years before the import date. There is no grace period after the expiration date. No whole-herd TB test is required. No import permit is required.

- **Michigan's MA zone (Alcona, Alpena, Montmorency and Oscoda counties):**
 - Each animal must have a negative individual TB test within 60 days of import and originate from a herd that has had a negative whole herd TB test within the last 12 months of all animals in the herd one year and older. The dates of both tests must be written clearly on both the import permit application form and the CVI.
 - The CVI must contain a statement that the animals are attending the show only and will return to the herd of origin after the show.
 - Animals are eligible to participate in sales; however, they must return to their herd of origin in Michigan after World Dairy Expo and then travel to their new owners in compliance with the import requirements of the state of destination.
 - An import permit must be obtained from the Wisconsin Department of Agriculture, Trade and Consumer Protection (DATCP) before the animal enters Wisconsin. For more information, call 608-224-4872 or go to <https://datcp.wi.gov/Documents/GeneralImportForm.docx>
 - **All other states:** No TB testing is required at the time of this publication. Requirements can change. For the latest information by state, call 608- 224-4872 or go to https://datcp.wi.gov/Pages/Programs_Services/WorldDairyExpo.aspx.
 - **Outside the United States:** Animals will need to meet the import requirements established by the United States Department of Agriculture (USDA). You can learn more by calling the National Center for Import and Export at (301) 851-3300 or go to <http://www.aphis.usda.gov/wps/portal/aphis/ourfocus/importexport>.
 - No other tests or statements are required, unless otherwise noted.
 - No permits are required, unless otherwise noted.
- If there are problems with the paperwork, the animals will be moved to an isolation area until corrected health papers arrive:
 - If animals do not have a CVI, whether traveling from Wisconsin or out-of-state, the animals will remain on the trailer in the isolation area until a completed CVI arrives or be required to return to the farm of origin.
 - If the CVI has expired, the animals will remain on the trailer in the isolation area until a CVI with the correct inspection date is noted, or be required to return to the farm of origin.
 - If the TB test is expired or missing the animals will remain on the trailer in the isolation area until a corrected CVI is faxed. If no TB test proof is provided, the animal may not show and must stay in isolation or leave Wisconsin.
 - If cattle from Michigan's MA zone have no import permit, the animals will remain on the trailer in the isolation area. The exhibitor/veterinarian will need to contact the Wisconsin Animal Health Officials to notify them of the import violation.

It is the exhibitor's responsibility to stay informed of any status changes or modifications that may have an impact on their trip to World Dairy Expo.
