All must be bred by the exhibitor and at least one animal must be owned (solely or in partnership) by the exhibitor. Breeder is identified as listed on the registration paper. Where animals are bred by different members of a family, and where the herd is one unit, they are considered as bred by one breeder. When animals are bred in partnership, each partnership is considered a unique breeder. Each exhibitor is limited to one entry. # SHOW YOUR COWS THAT YOU CARE

## Our Barn-Grooving Solutions Keep Your Cows in Good Standing

Slippery barn floors are a common cause of injuries to cows, and can create big problems for dairy farmers. You can avoid this problem by grooving their floors to create traction. SMITH's FS351 DCS self-propelled heavy-duty scarifier is the perfect tool for creating these grooves.

It is capable of removing a path up to 16 inches wide, and can be equipped with a wide variety of cutters to create nearly any groove pattern or surface profile. The FS351 DCS also features SMITH's exclusive electronic DCS Depth Control System, which allows users to precisely adjust the cutter depth without stopping production.

- *Self-propelled with easy speed adjustment*
- *Side plate for faster drum changes*
- *Vacuum ports for dust collection*
- *Available in gasoline, electric, and propane-powered versions*
